

## SEASONAL MOSQUITO CONTROL TRAPPER

### POSITION DESCRIPTION:

Work under the direction of the Mosquito Control Supervisor. Be assigned to work areas in Elmore County which he/she performs mosquito surveillance and trapping activities using mosquito trapping systems provided by Elmore County Mosquito Abatement District. This job will be approximately 20 hours per week for approximately 4 months, depending on environmental conditions. Training will be provided to complete the following duties:

Be punctual and provide services in a timely manner within a specified timeframe.

Keep accurate record of trapping sites visited; using forms provided by the District.

Delivering all trapped mosquitos to the Mosquito Control Office where specimens are typed by species and counted.

Though trapping sites are pre-determined by the Mosquito Control Supervisor, updated field maps as needed.

Follow all safety equipment procedures with care.

Represent the county by following all driving rules and regulations and interacting with the public in a positive, professional manner.

Can adapt to the irregular hours inherently involved in public mosquito control. Work hours will be flexible evening and morning hours using personal vehicle.

Compile, analyze and maintain operating records and prepare definitive reports.

Plans and organizes inspections and control operations in conformance with federal/state laws, District policy; program objectives and methods and findings determined by the Mosquito Control Supervisor.

Work effectively and cooperatively with superiors, subordinates, and the public.

Monitors and reviews records for accuracy, completeness, and efficacy of collection. Prepares specimens for safe shipping to lab within the timeframe allotted.

Will not share information related to the surveys without advice from Mosquito Control Supervisor.

Can walk over uneven sloping terrain while carrying backpack and/or trapping equipment up to 65 pounds.

Be safety-minded with the ability to keep detailed records and evaluate situations while accurately adopting an effective course of action.

Can work independently and cooperatively with other employees and the public.

Perform other job duties as assigned by the Mosquito Control Supervisor.
