

# MOSQUITO PROBLEMS START AT HOME

Don't give mosquitos a chance.

Wherever water collects, mosquitos can breed.

Neglected swimming & wading pools

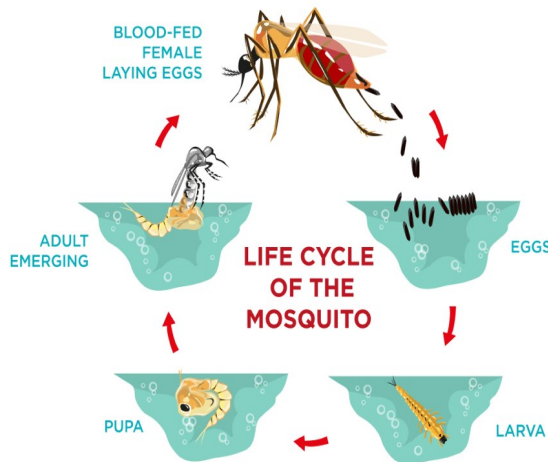

Overgrown ponds

Leaf-clogged gutters

Flower pots & saucers

Water from leaky faucets

Rain barrels

Used tires

Bird baths

Mosquitos need water to breed and grow. It doesn't take much water. It doesn't take much time. Almost anything that will hold water for one week or longer can produce these pests. Many places around your home may be causing mosquito problems. To eliminate these problems, eliminate any standing water.
